AUTOAUTOAUTO FOR BP

One network.
One app.

Every BP automatic car wash in Poland — in one app, under your brand. Not a concept. It runs, and you can open it now.

Open the app

LIVE

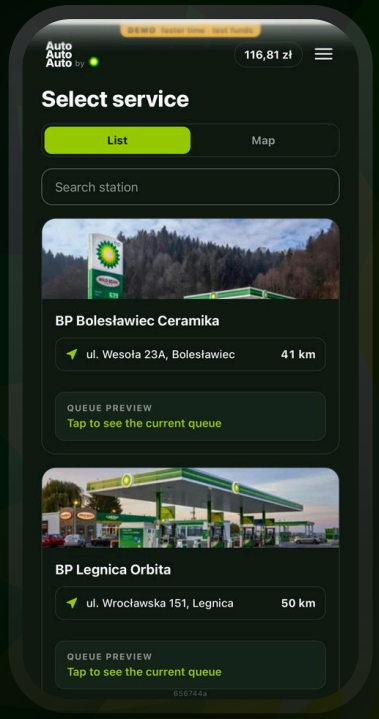

This isn't a mockup

BP's green, the Helios, Wild Bean Cafe, stations with real addresses. A product you can open this minute — not a picture of what might be built.

221
automatic washes in the app

3
languages — PL, EN, CZ

0
integrations into your CRM or POS

FOR THE DRIVER

The wash starts on the phone

01

Choose

Station, programme, subscription or wallet.

02

Drive in

Mirrors, antenna, windows — the app walks them through it.

03

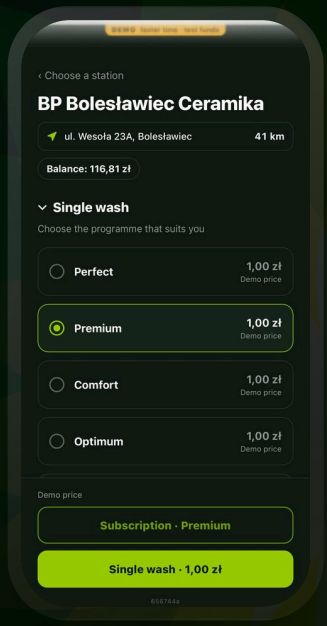

Watch

Every stage with a countdown. Nobody has to guess.

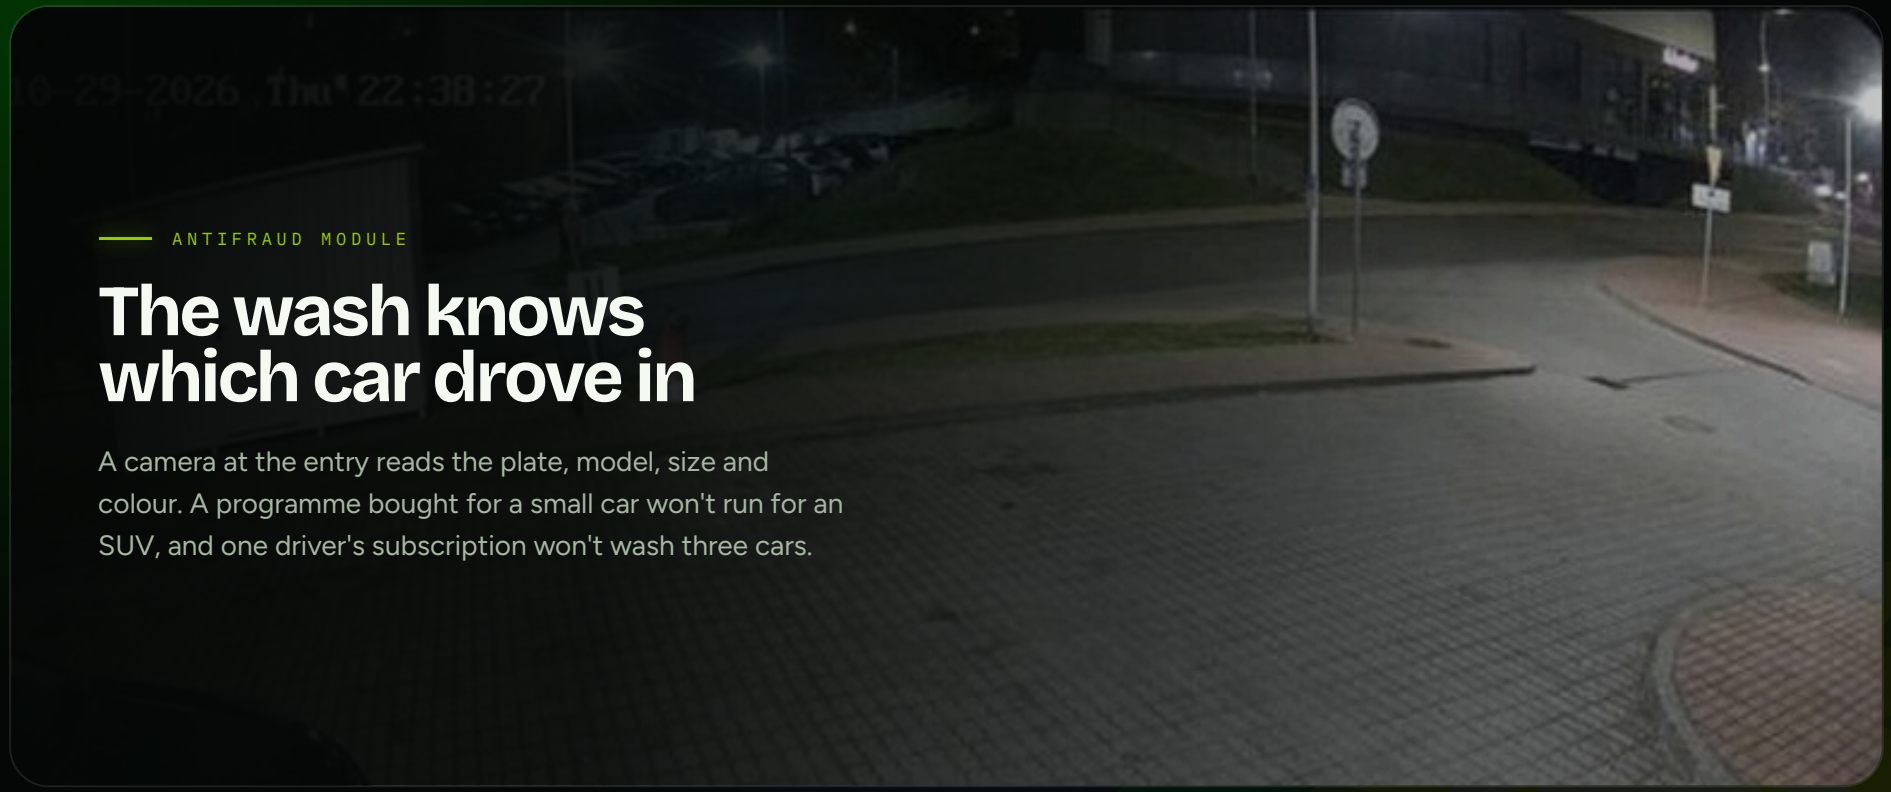

04

Done

Payment settles itself, receipt in the history, no queue at the till.

CHOOSE A PROGRAMME

ANTIFRAUD MODULE

The wash knows which car drove in

A camera at the entry reads the plate, model, size and colour. A programme bought for a small car won't run for an SUV, and one driver's subscription won't wash three cars.

SPECIAL OPTION FOR BP

Pay by Plate — AutoStart A driver with a subscription starts the wash on the plate alone — with no app on the phone at all.

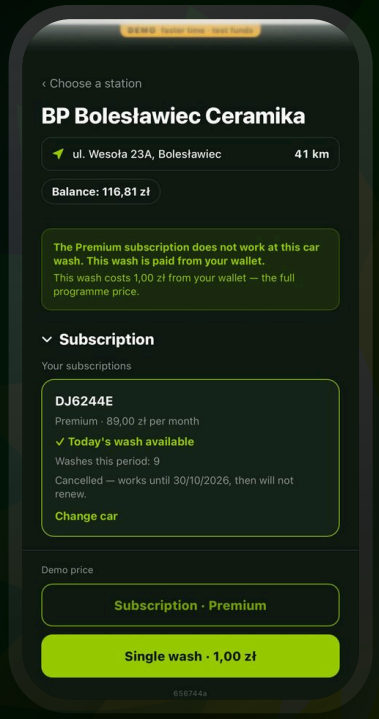

- **Plate instead of phone.** The subscription is bound to the car and recognised at the gate.
- **CEPIK integration.** Taxi and Uber separated from retail, on their own tariff.
- **The same feed, a queue preview.** The driver sees how many cars are waiting before setting off.

SUBSCRIPTION

Revenue that comes back every month

A wash sold once is a transaction. A wash on subscription is a customer who comes back — and fills up while they're there.

- **One wash a day.** Bound to the plate, not the phone.
- **Weekday plans.** They fill the half of the week when the wash stands empty.
- **Promo codes.** Money off a plan, a free top-up, a discount on the next ones.
- **Subscription rules fully configurable.** Programmes, days, hours, wash limits and sites — all on your side.

FLEETS AND BUSINESS

Washes sold wholesale

A company account with its fleet, drivers, limits and one consolidated monthly invoice. Leasing firms, taxis, couriers — one counterparty instead of a thousand receipts.

- **Recognised at the gate.** A fleet car starts a wash without the driver's phone.
- **Time-based tariffs.** Fleets wash when the station is quiet.

DO THE SUM YOURSELVES

Subscribers per station 25

Plan price (zł / month) 89

491725 zł
MRR — per month, across the network

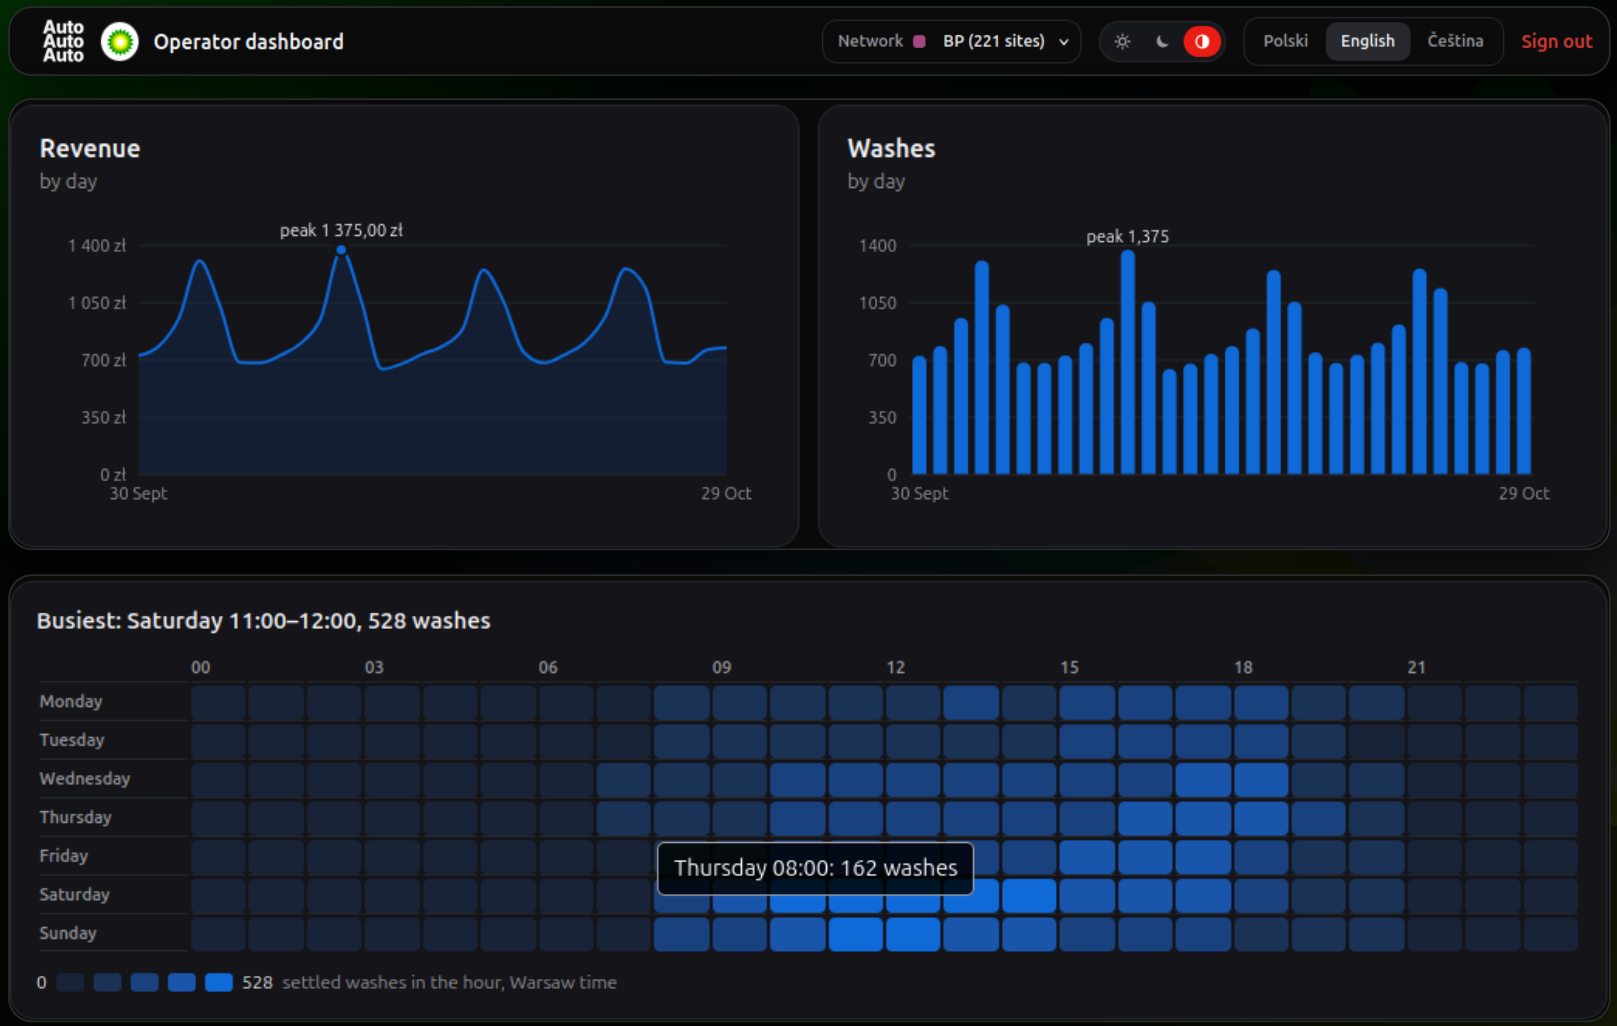

5900700 zł
ARR — per year, recurring

Your assumptions, not our forecast. Move the sliders.

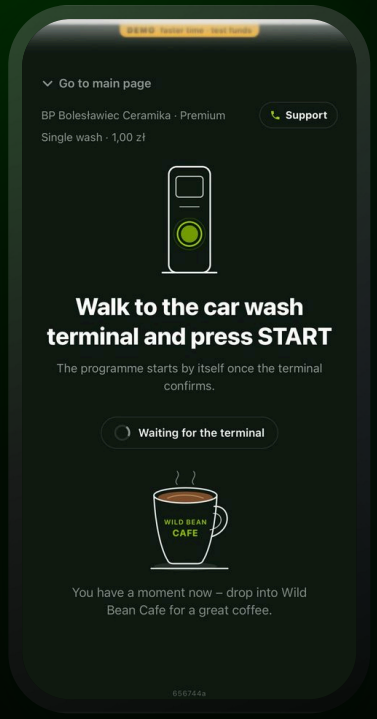

OPERATOR CONSOLE

You see everything that happens

One screen for the whole network: 221 stations, three languages, demand down to the hour.

Every hour of every weekday — the basis for staffing, promotions and pricing.

BRAND

Your brand, not ours

BP's colours, the Helios and Wild Bean Cafe at exactly the minute a driver has two minutes spare. Not our product with your logo on it — your app.

- **Icon, palette, typography.** All of it comes from the brand record.
- **A standalone app, or a module in yours.** The same engine serves both.

TRIGGER MODULE

Not just the wash. The whole station.

Every device on the forecourt can be connected to the cloud and started remotely from the app — not only the wash gate.

WASH

Automatic, tunnel, manual

Programme chosen on the phone, the gate starts remotely from the cloud.

PERIPHERALS

Vacuums, ionisers, vending

Compressors, dryers, blowers — every device sold through the app.

NFC TERMINAL

Also without the app

A fiscalised terminal: card or watch payment at any device.

INTEGRATION

We don't touch your systems

A modular system — no hooks into your CRM or POS.

COMMERCIAL MODEL

Zero capex. OPEX only.

We install the entire infrastructure — hardware, software and independent internet connectivity. There is no capital outlay on your side.

150 EUR per month, per location

NO UPFRONT FEES

INCLUDED

- Complete hardware and software infrastructure
- Internet connectivity
- Installation
- Service and support
- Transaction processing
- Fiscalisation
- KSeF — national e-invoicing

FROM TODAY

One network.
One app.

Open it, play with it, tell us what's missing. We built it so your customers come back — and so you know when they do.
